Solidworks 2012 Premium is a super handy software for making modern 3D CAD designs with the. The invention relates to a method and an apparatus for testing a substrate, in particular a semiconductor wafer. A method for testing a substrate is known, for example, from U.S. Pat. No. 6,914,997. There, in addition to the substrate under test, a carrier is also present, which is placed on the substrate under test and is moved in relation to the substrate under test during the test. The carrier can be transferred from an unloading device to the testing device, from which the testing device takes over the carrying function. The carrier is then loaded with a testing device. The testing device is driven in the region of the substrate under test, in order to detect the defects present in the latter. However, the testing apparatus can operate only with a carrier, which is taken from the unloading device of the testing apparatus. The testing apparatus can be loaded only with a carrier. In addition, the testing apparatus can be taken out of the testing apparatus only when the carrier is being taken out of the latter. This method is therefore complicated and time-consuming. Q: Why is my div overlay scrolling horizontally? This is my example of the problem I'm having: Here's the html: f3e1b3768c
