

Pocket PC Installation Creator Crack Activation Key

Pocket PC Installation Creator [Win/Mac]

Pocket PC Installation Creator is a program, which helps you to create installations for Pocket PC Applications. It will scan for installed applications in your computer, and will create, according to selected installation options, cab files and self-extracting setup. Installation creation process will be a lot easier, since in the majority of cases, you don't need to edit.inf files manually. You can use Pocket PC Installation Creator, which automatically creates setup.inf, setup.cab and setup.exe files, for your selected application, from .inf file of your Pocket PC Application. Pocket PC Installation Creator supports creation of both setup.inf files and cab files for self-extracting installations. Pocket PC Installation Creator allows to create self-extracting installations for Windows applications as well. Usually self-extracting installation file is smaller than setup.inf file. It includes compiled cab(s) file(s) for the application, and Windows Installer is used to extract the cab(s) file(s) on Pocket PC. And even more, Pocket PC Installation Creator also can create boot loader in the beginning of the disk. It supports bootstrapping projects to be able to create compressed, self-contained, self-extracting setup programs for Pocket PC Applications. Possible installation methods: [?] Create self-extracting setup program from .inf file, if this file contains .cab (cab collection) of the application to be installed. [?] Create self-extracting setup program from .inf file and .exe (executable) file. [?] Create self-extracting setup program from both .inf and .exe files. [?] Create self-extracting setup program from both .inf and .cab (cab collection) files. Installation creation process is based on Wizard interface. You can chose the default installation settings from there, which will be shown to you in dialog. This dialog allows you to choose one or more source files for the application to be installed. You can select one or more sources by clicking on the required source files from the list. All chosen files will be scanned and this list will be shown. In this list, you can choose the source file(s) for the application to be installed. All selected files will be scanned and the list will be shown. You can also create different installations for Windows and Pocket PC from
