The Israeli company Vivaldi is one of the pioneers of the new browser trend. However, the software still has some issues. In order to overcome these problems, the company decided to add a few extra features to their web browser. Vivaldi Ad Blocker Features According to the developers, the Vivaldi Ad Blocker should be the most important feature. It lets you install the browser extensions to block ads on any website that you visit. Naturally, Vivaldi Ad Blocker comes with a lot of useful functionality. For example, it will let you use an open-source HTML5, CSS3 and JavaScript framework named Bootstrap on your website. It will also block Google Analytics tracking code. Additionally, the extension will display web pages in a nicer, cleaner way. Vivaldi browser gives you the option to display web pages in a horizontal orientation. With this feature, you can easily see all web pages simultaneously. You can also use the extension to display web pages with a rounded top border. You can also specify which web pages you can see and which ones will be hidden. Apart from Ad Blocker, the extension will also help you share website articles to your social media pages, read RSS feeds, and create bookmarks with one single click. You can also keep a record of websites that you have visited. The history will be stored for a long period, and even after that you can access your browsing activity anytime. Another interesting feature of Vivaldi Ad Blocker is the Privacy Manager. This feature gives you the option to open a private window on your website. Therefore, the extension will let you enjoy all your website pages without ads or unwanted social network and tracking applications. Another useful feature is Sync. With this feature, you can backup all your data by simply connecting the device to your computer and syncing. Vivaldi Browser Extension for iOS When you download the Vivaldi Browser Extension for iOS, you get a variety of useful features in return. For example, the extension will help you clear and clean your browser history by erasing the data. The extension also comes with a built-in web browser that supports iOS functions such as browsing history and bookmarks. You can also add new bookmarks, refresh web pages, go to a specific URL, manage your web browser, and many other common functions. Vivaldi Ad Blocker for iOS
