PensionPlaner is built for many kinds of interest-calculations based on regular monthly transactions. The ability to take into account and compensate the effects of inflation vastly broaden the possible applications. PensionPlaner helps professionals like insurance brokers to impress their clients and increase sales, i.e. estimates that illustrate the urgency of a pension scheme assist in promoting the appropriate products. For educational purposes PensionPlaner helps teachers make a point and gives students an opportunity for hands on

trials of their own. Nonprofessionals can also benefit from PensionPlaner; it lets anyone interested in their financial future gather invaluable insight by exploring different scenarios and finding the optimal strategy for their personal requirements. PensionPlaner uses powerful mathematics, so it doesn't restrict you to a single point of view. It's easy to use interface allows you to effortlessly try various schemes with different parameters and interdependencies. Graphs illustrate the matter. PensionPlaner is not some kind of tax consultant software. Compensating taxes and other rules and

regulations is up to you. It's also not an insurance calculator. The underlying model for the calculations is an account. Any credit in the account collects interest. Money can be deposited at any time. Withdrawals are possible when they're covered - you can't overdraw. Deposits and withdrawals can be compensated for inflation. A practical application of this model is a fund. PensionPlaner: PensionPlaner is built for many kinds of interest-calculations based on regular monthly transactions.
