This new version is a full-featured, fast, native Windows. This version of Noteworthy is built from the ground up to be a complete successor to the Noteworthy C. version 2.5 Full.Q: Web API mapping to query-string URL parameters I have a Web API action that takes an integer parameter. public void DoStuff([FromUri] int id) If I pass in a non-null value, I want to do some work, and return a result if successful. If I pass in a null value, I want to throw an error. My problem is this is how I'm getting the value, and I don't think this is the best way to solve the problem. So I have: [HttpGet("movies/{id}")] public IActionResult GetMovie(int id) and: [HttpGet("movies/{id}")] public IActionResult GetMovie(string id) And I don't think it's possible to just do {id}, because it will just use the first parameter. Maybe I'm just missing something obvious. A: The HTTP spec does not support this out of the box. It does support GET /movies/foo and GET /movies/bar if you follow the
