This technology is so complex that it will revolutionise how football will be played in years to come. Introducing it to FIFA Football 19 was one thing, but this is the first time that a game will incorporate the HyperMotion Technology throughout the gameplay. The in-game commentary will provide an insightful look at the new, hyper-realistic in-game experience. Innovations have also been made to the actual game to ensure that the gameplay is a true representation of what is happening on the pitch. The rich and authentic player models feature highly advanced, photorealistic facial capture technology, with a flexible head shape and neck anatomy captured using motion capture data during play. The scans of the faces of the players are then converted to 2D meshes, and then scanned again during a second life scan to achieve near photorealistic skin and tattoos. Player attributes are also advanced thanks to the integration of a new, highly detailed player model. It features: a highly articulated head and neck, hair with countless sub-brains, hundreds of individually skinned virtual muscles, 27 uniquely accurate injury events, tailored to each player, and dynamic skin as players warm up in the match, flexing and relaxing their muscles. The game also introduces Ultimate Team's new Mode, called ULTIMATE COMBO ATTACK Mode, which will feature the game's unique ability to add numerous new team synergies to the existing gameplay, including unique offensive moves, finishing moves, tactics and ball control. This mode will allow players to create their own customized team and become the ultimate attacking superteam. FIFA Football 19 Ultimate Team includes the all-new In-Game Transfer Market where players can unlock and collect players directly from the likes of Europe's best leagues, including England, Spain and Italy. **What's new:**

- ~~Rise through the divisions~~ are new power sliders in every mode to help you fine tune your skills.

FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay.

- Career Mode - Live out your dreams as both a manager and a player in FIFA 22. Create the newest club in FIFA, design your kits, style your stadium, and choose whether to compete with the elite or rise up from the lower divisions as you manage your club to glory. Or test your skills as a player, with a more immersive Player Edition mode that gives you more of a FIFA experience. As the manager and player, FIFA is similar to the Club World Cup, but with the gamier things that make FIFA really fun to play. The first of which is it is incredibly realistic. The second is that FIFA has improved its predictability. Call it objectivity, but games like these generally evolve to become better over time. Like its predecessor on Xbox, FIFA Season 17 is based on real-life events, with the first batch being the world cup. EA has added some new gameplay features. The biggest being new ways to score goals. The other is AI improvements. The goalkeeping modus operandi has also been totally thrown out. Defenders are able to make runs to the wings and cut inside even before the ball is collected or crossed. And lastly, the ability to clear the ball with your feet rather than with your hands has been added. The graphics are good and this year the game is all about being centered. The best views have been moved closer to the action. If you want an endless amount of speculation then stick to playing FIFA. If you want some of the most popular versions of the game, then go get FIFA 22 season, 16. Since its release in 1989, the award-winning video game FIFA evolved into the largest club competition in the world. For the first time on the ios, try the new FIFA mobile by EA and showoff your football skills.
