Field of the Invention The present invention relates to a device for the introduction of a catalyst into the exhaust gas stream of an internal combustion engine of a motor vehicle, wherein the exhaust gas stream is conducted via an exhaust gas pipe and the catalyst is arranged in the exhaust gas pipe. The device for introducing the catalyst into the exhaust gas stream of an internal combustion engine of a motor vehicle includes an inlet pipe open at the upstream end, through which exhaust gas stream is conducted. At the downstream end there is arranged a catalyst carrier holding a catalyst. There is also provided a conveying device which is connected to the inlet pipe and is provided with a conveying propeller extending through the catalyst carrier. The conveying device conveys the catalyst carrier through the inlet pipe. 2. Description of the Related Art A device for the introduction of catalysts into the exhaust gas stream is known from European patent application EP 0 712 535. This device relates to the introduction of a catalyst in the exhaust gas flow of an internal combustion engine in a motor vehicle. The device comprises a catalyst carrier, through which exhaust gas stream is conducted, as well as a conveyer
