Q: Why does the remainders on bits swapped for the left and right shift operators differ? I am currently learning about the bitwise operators, and doing some experiments with left and right shifting. I noticed that when I performed a left shift with the operands separated into the right and the left portion, and then tried to subtract the two values, the value of the left shift's remainders is not the same as the value of the right shift's remainders. Is it only by chance, or is there a specific reason for this? Below is the code I used to test the issue. import random for n in range(10): maxn = 2**n maxn_2 = 2**n**2 maxn_4 = 2**n**4 maxn_8 = 2

The school or district administers the Maryland Adolescent and Adult Literacy Skills Program Assessment (MALSPA) in the spring of each year.Life is Strange is one of the best games out this year that you've probably never played. It's a gripping and emotional story about the way life, past actions and emotions can haunt you. But what if they didn't have to? What if, in real life, we could use our brains to work out how best to deal with any problems or challenges that present themselves? Toby Haber and Wil Plageman, creators of the fascinating trivia book Memory Palaces, are behind a new Kickstarter project in which they hope to expand on their ideas about how to solve problems through neuroscience. Titled 'Memory Theory: A Guide to Deliberate Strategies for Life', the book hopes to share the Life Is Strange premise that there are different ways of thinking about the world, and using our brains to control and change our behaviour is the most productive. It sees Haber and Plageman set out a four-stage approach to memory, inspired by theories that govern learning and growth. The first stage – 'Construction', in their terms – sees individuals make some kind of representation or interpretation of the world. This might involve visualising a concept, a mental image, a story or a vista that has been experienced. 'Construction' is essentially what we do when we make sense of the world, and how that leads to actions. It's why we can read a map and then respond to the direction we have been given, or why someone might
